MEADOWLARK ACRES
NATURE & EDUCATION CENTER
N5146 North Road Burlington, WI 53105
We hope you will enjoy exploring our walking trails which interlace over 50 acres of beautiful Wisconsin countryside, encompassing deciduous woodland, coniferous plantations, grasslands, farmland and a pond. This mix of habitat makes Meadowlark Acres a very attractive place for wildlife. Fellow Mortals Wildlife Hospital even releases some of their rehabilitated patients here, so if you spot an opossum, a cottontail or a wood duck, they may be former patients.

We hope you enjoy your walk and that you spot some of the wildlife mentioned in this brochure.

**Species to look out for:**

- Opossum
- Woodchuck
- Red Squirrel
- Wren
- Red-tailed Hawk
- Thirteen-lined Ground Squirrel
- Meadowlark
- Great Horned Owl
- Barred Owl

There are many walking trails at Meadowlark Acres and we hope you will enjoy exploring them. The pond attracts lots of wildlife friends so find a spot, sit quietly and keep your eye open for birds and mammals coming for a drink or a swim!

If you are looking for a leisurely stroll then we suggest a visit to the enchanting pine tunnels or a moment of reflection on the memorial ridge.

The walking trails are maintained regularly, however, some areas can be muddy or slippery due to rain so please wear appropriate footwear and always let someone know where you are going before heading out on a walk.

Happy walking and wildlife spotting!
